WORK EXPERIENCE

Solstice Consulting • Chicago, IL

April '17 – Present **Agile Product Consultant**

- Partner with technology and business organizations to gather, evaluate and prioritize business requirements to facilitate agile software development and product delivery for our portfolio of Fortune 500 clients
- Successfully managed the product backlog for two separate self-service applications and supported four production releases in twelve months with minimal time spent in QA
- Coaching business stakeholders to effectively fill the Product Owner role on a Scrum team and advising waterfall technology teams how to embrace agile work processes
- Supporting the agile transformation at the largest options and futures exchange

Procter and Gamble • Cincinnati, OH

Aug '15 – April '17 **Technical Project Manager**

- Delivered \$375M in capital cost avoidance by investigating opportunities to repurpose existing parts and proving performance parity with the original design
- Led an emergency intervention to improve manufacturing quality standards after analyzing an increased volume of negative consumer feedback
- Enabled a 2% reliability improvement on our Pampers Baby Dry business ahead of schedule by engaging with manufacturing partners through a series of design reviews to quickly address key areas of productivity loss
- Developed a .NET application to automate and customize query operations across multiple QA databases to increase productivity for manufacturing engineers

May '14 – Aug '14 **Research & Development Intern**

- Developed and validated a new work process for color management on various nonwoven substrates based on analysis of current industry standards and methods

EDUCATION
